PROFESSIONAL SUMMARY

BCA fresher and aspiring software developer with hands-on experience in Python, JavaScript, React, and C/C++. Built practical projects including a recipe desktop app, an AI voice assistant, and a Discord automation bot. Strong interest in application development, automation, and problem solving.

TECHNICAL COMPETENCIES

Programming: Python, JavaScript, C, C++

Frontend: HTML, CSS, React

Tools/ Tech: Tkinter, SQLite, NumPy, Discord.py, Speech Recognition, Edge TTS

Other: Automation, GUI Development, Web Development

INTERPERSONAL SKILLS

Self-motivated | Teamwork | Time Management | Problem Solving |
Communication | Learning Mindset

INTERESTS & HOBBIES

Coding | Gaming | Building Projects | Learning New Tech

LANGUAGES KNOWN

English | Hindi

EDUCATION

BCA (Bachelor of Computer Applications)
Chandigarh College of Technology, Chandigarh Group of Colleges, Landran
Session: August 2023 - June 2026

TRAINING & PROJECTS

Project Title: PokeDex – Pokémon Card Game

Developed a web-based Pokémon card game using HTML, CSS, JavaScript, and SQLite.

Implemented secure user login and authentication.

Built a digital card collection and management system.

Added card sharing/trading functionality between users.

Designed a responsive and interactive user interface.

Technologies: HTML, CSS, JavaScript, SQLite.

Project Title: S.A.M - System Analyzer and Manager

Built a Python-based AI voice assistant.

Implemented speech recognition and text-to-speech.

Integrated local AI models using Ollama/Llama.

Added browser automation, task management, and voice commands.

Technologies: Python, Speech Recognition, Ollama, Edge TTS.

Project Title: CoreRex Discord Bot

Developed a Discord bot for server management and automation.

Implemented commands, event handling, and modular architecture.

Added music, alerts, and utility features.

Technologies: Python, Discord.py.

Project Title: Random Recipe Generator

Developed a desktop application to generate and manage recipes using Python.

Built a graphical user interface using Tkinter.

Used SQLite for recipe storage and retrieval.

Implemented recipe selection and data processing features.

Utilized NumPy for data handling and application logic.

Technologies: Python, Tkinter, SQLite, NumPy.
